

CHAMBER TYPE BULLET SEATER DIES - L.E. WILSON 300 NORMA MAGNUM BULLET SEATING DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Wilson chamber type bullet seater is a favorite among benchrest shooters. A chamber type bullet seater positively controls both bullet and cartridge case alignment. The case and bullet are completely captured by the die prior to the bullet being pushed straight into the case by a close-fitting seating stem. This style of bullet seater works more accurately than a conventional 7/8 inch to 14 bullet seating die. This is one of the most accurate bullet seaters ever made!

Attributes

- Name: [L.E. WILSON 300 NORMA MAGNUM BULLET SEATING DIE](#)

Safety Instruction Guide for CHAMBER TYPE BULLET SEATER DIES L.E. WILSON 300 NORMA MAGNUM BULLET SEATING DIE

Introduction

Thank you for choosing the L.E. Wilson Chamber Type Bullet Seater for your reloading needs. This guide provides essential safety instructions and usage information to ensure safe and effective operation of the product. Please read this guide thoroughly before use.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose: seating bullets in cartridges.
- Keep the product out of reach of children and vulnerable individuals.
- Always wear appropriate safety gear, including safety glasses and gloves, when using reloading equipment.
- Do not use the bullet seater if it appears damaged or malfunctioning.
- Regularly inspect the bullet seater for wear and tear, and replace any worn parts as necessary.
- Follow all manufacturer instructions and guidelines to avoid accidents and injuries.

Specific Safety Precautions for Use

- Always work in a wellventilated area to avoid inhalation of any dust or fumes generated during reloading.
- Ensure that the work surface is stable and free from clutter to prevent accidents.
- Keep fingers away from the die opening when seating bullets.
- Use only compatible cartridges with the bullet seater to avoid malfunctions.
- Do not force the bullet into the cartridge; if resistance is felt, stop and check for alignment issues.
- When adjusting the die, ensure that the press is at rest to avoid sudden movements.
- Store the bullet seater in a dry and secure location to prevent rust and damage.

Instructions for Installation and Usage

1. Installation

- Begin by securely mounting the die into your reloading press according to the manufacturer's instructions.
- Ensure that the die is tightened properly to avoid movement during operation.
- Adjust the seating stem according to the desired bullet seating depth as specified in your reloading data.

2. Usage

- Prepare your cartridge cases by cleaning and inspecting them for defects.
- Place a bullet into the case mouth, ensuring it is properly aligned.
- Insert the cartridge into the die and activate the press to push the bullet into the case.
- Monitor the seating process closely; ensure that the bullet is seated straight and to the correct depth.
- After use, clean the die to remove any residue and maintain its performance.

Disposal Instructions

- Dispose of any used or damaged components according to local regulations.
- Do not dispose of the bullet seater in regular household waste.
- Contact your local waste management facility for information on safe disposal methods for reloading equipment.

Contact Information for Further Support

For any inquiries related to safety, usage, or maintenance of the L.E. Wilson Chamber Type Bullet Seater, please refer to the manufacturer's website or customer support services. Ensure to have your product information ready for a more efficient response.

By following these safety guidelines and instructions, you can ensure a safe and effective reloading experience with your L.E. Wilson Chamber Type Bullet Seater. Thank you for prioritizing safety in your reloading practices.
