

WILSON CASE GAGE - L.E. WILSON 300 NORMA MAG CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [L.E. WILSON 300 NORMA MAG CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749018852
- Mfr. No.: CG-300NM
- Cartridge: 300 Norma
- Delivery weight: 0.091kg
- Shipping height: 38mm
- Shipping width: 38mm
- Shipping length: 89mm
- UPC: 815145027269

WILSON CASE GAGE Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE L.E. WILSON 300 NORMA MAG CASE GAGE. This guide provides essential safety instructions and usage guidelines to ensure safe and effective operation of the product. Please read this document carefully before using the gage.

General Safety Guidelines

- Ensure the product is used only for its intended purpose. The WILSON CASE GAGE is designed specifically for measuring cartridge case headspace and overall length.
- Always handle the gage with care to prevent damage and maintain accuracy.
- Store the gage in a safe, dry place away from children and pets.
- Regularly inspect the gage for any signs of wear or damage. Do not use if the gage is damaged.
- Follow all local laws and regulations regarding the use of reloading equipment.

Specific Safety Precautions for Use

- Always wear safety glasses when using the gage to protect your eyes from potential debris.
- Keep hands and other body parts away from the gage's measuring area while in use.
- Ensure that the gage is clean and free of debris before and after use.
- Do not exceed the manufacturer's recommended specifications when resizing brass.
- Be aware of the potential for oversizing brass, which can lead to unsafe reloading practices.

Instructions for Installation and Usage

1. Setting Up the Gage

- Place the WILSON CASE GAGE on a stable, flat surface.
- Ensure that the gage is clean and free from any obstructions.

2. Measuring Headspace

- Insert the fired cartridge case into the gage.
- Use a caliper to measure the headspace of the case.
- Compare the measurement to the manufacturer's specifications for your specific caliber.

3. Checking Overall Length

- Insert the cartridge case into the gage.
- Check the overall length to determine if trimming is necessary.
- If trimming is required, use appropriate trimming tools to achieve the correct length.

4. Adjusting for Belted Magnums

- For belted magnums, ensure that the resizing process minimizes impact on the shoulder area.
- Regularly check the shoulder area of the case to prevent premature failure.

5. PostUse Care

- Clean the gage after each use to remove any residue or debris.
- Store the gage in its original packaging or a protective case to prevent damage.

Disposal Instructions

- Dispose of the gage in accordance with local regulations.
- If the gage is no longer usable, consider recycling materials if applicable.
- Do not dispose of the gage in regular household waste if it contains hazardous materials.

Contact Information for Further Support

For any inquiries related to safety or product performance, please contact the manufacturer or your local retailer. Ensure that you have your product information and any relevant details ready for a more efficient response.

Thank you for your attention to these safety instructions. Your safety and satisfaction are our top priorities. Happy reloading!
