

CHAMBER TYPE BULLET SEATER DIES - L.E. WILSON 300 AAC BLACKOUT BULLET SEATING DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Wilson chamber type bullet seater is a favorite among benchrest shooters. A chamber type bullet seater positively controls both bullet and cartridge case alignment. The case and bullet are completely captured by the die prior to the bullet being pushed straight into the case by a close-fitting seating stem. This style of bullet seater works more accurately than a conventional 7/8 inch to 14 bullet seating die. This is one of the most accurate bullet seaters ever made!

Attributes

- Name: [L.E. WILSON 300 AAC BLACKOUT BULLET SEATING DIE](#)

CHAMBER TYPE BULLET SEATER DIES L.E. WILSON 300 AAC BLACKOUT BULLET SEATING DIE Safety Instruction Guide

Introduction

Thank you for choosing the L.E. Wilson Chamber Type Bullet Seater for your reloading needs. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of this product. Please read this guide carefully before using the bullet seater to minimize risks and enhance your reloading experience.

General Safety Guidelines

- Always ensure that you are using the product in a wellventilated area to avoid inhaling any dust or debris.
- Keep the bullet seater out of the reach of children and pets.
- Use the product only for its intended purpose as described in this guide.
- Regularly inspect the bullet seater for any signs of wear or damage before each use.
- Store the bullet seater in a dry place to prevent rust and deterioration.
- Follow local laws and regulations regarding ammunition reloading and handling.

Specific Safety Precautions for Use

- Ensure that the bullet seater is compatible with the 300 AAC Blackout cartridge before use.
- Always wear appropriate safety glasses when operating the bullet seater to protect your eyes from potential debris.
- Use gloves to protect your hands from sharp edges or any potential contaminants.
- Do not exceed the recommended bullet seating depth as indicated by the manufacturer.
- Avoid using excessive force when seating bullets to prevent damage to the die or cartridge.
- Do not attempt to modify the bullet seater or its components in any way.

Instructions for Installation and Usage

Installation

1. Ensure that the reloading press is securely mounted and stable.
2. Clean the bullet seater to remove any manufacturing oils or debris.
3. Insert the bullet seater die into the reloading press according to the manufacturer's instructions, ensuring it is tightened securely.

Usage

1. **Preparation:** Ensure that you have all necessary components ready, including the cartridge cases, bullets, and powder.
2. **Case Insertion:** Place the prepared cartridge case into the shell holder of the reloading press.
3. **Bullet Placement:** Position the bullet on top of the cartridge case, ensuring it is centered.
4. **Seating the Bullet:**
 - Slowly lower the ram of the reloading press to seat the bullet into the case.
 - Use a consistent and controlled motion to ensure accurate seating.
 - Check the seating depth after each bullet to ensure compliance with specifications.
5. **Final Inspection:** After seating, inspect the completed cartridge to ensure proper alignment and seating depth.

Disposal Instructions

- Dispose of any damaged or worn components of the bullet seater in accordance with local regulations.
- Recycle metal parts where possible; check with local recycling centers for guidelines.
- Do not dispose of the product in regular household waste.

Contact Information for Further Support

For any questions or concerns regarding the use or safety of your L.E. Wilson Chamber Type Bullet Seater, please consult your retailer or the manufacturer's website for additional resources and assistance.

By following these safety instructions and guidelines, you can ensure a safe and effective reloading experience with the L.E. Wilson Chamber Type Bullet Seater. Thank you for your attention to safety and for choosing our product.
