Safety Instruction Guide for L.E. Wilson Micrometer Top Bullet Seater Die

Introduction

Thank you for choosing the L.E. Wilson Micrometer Top Bullet Seater Die for your reloading needs. This product is designed to provide accurate bulletseating depths, ensuring a reliable and safe reloading experience. Please read this safety instruction guide carefully to understand how to use the product safely and effectively.

General Safety Guidelines

- Ensure you are familiar with all safety practices related to reloading ammunition.
- Always use the product in accordance with the manufacturer's instructions.
- Keep the product out of reach of children and unauthorized users.
- Regularly inspect the product for any signs of damage or wear.
- Report any unsafe products or accidents to authorities.
- Stay informed about recall updates through the EU Safety Gate platform.

Specific Safety Precautions for Use

- Use the Micrometer Top Bullet Seater Die only with an Arbor Press as recommended.
- Always wear appropriate personal protective equipment (PPE), including safety glasses and gloves, when reloading.
- Avoid overtightening the threaded cap to prevent damage to the die.
- Ensure that the workspace is wellventilated and free from flammable materials.
- Do not exceed the recommended bulletseating depths as specified in your reloading manual.
- Be cautious of the potential for lead exposure; wash hands thoroughly after handling bullets.

Instructions for Installation and Usage

1. Installation:

- Secure the Arbor Press on a stable surface.
- Insert the L.E. Wilson Micrometer Top Bullet Seater Die into the Arbor Press according to the manufacturer's guidelines.
- Adjust the threaded cap to ensure the die is firmly in place without excessive force.

2. Usage:

- Prepare your bullets and cases according to your reloading procedure.
- Use the micrometer scale to set the desired bulletseating depth in 0.001" increments.
- Place a bullet into the case and position it under the die.
- Apply steady pressure on the Arbor Press handle to seat the bullet to the desired depth.
- Inspect the seated bullet for proper depth and alignment.
- Repeat the process for additional rounds, making necessary adjustments as required.

3. PostUse Care:

- Clean the die after each use to prevent residue buildup.
- Store the die in a dry, safe place away from moisture and direct sunlight.

Disposal Instructions

- Dispose of any damaged or worn components of the Micrometer Top Bullet Seater Die in accordance with local regulations for metal waste.
- Ensure that all reloading materials, such as spent casings and unused bullets, are disposed of safely and responsibly.
- Do not dispose of hazardous materials in regular trash; consult local waste management guidelines for proper disposal.

Contact Information for Further Support

For any questions or concerns regarding the use of the L.E. Wilson Micrometer Top Bullet Seater Die, please refer to the manufacturer's website or contact their customer service directly. Always ensure that you have the most current information and support for your product.

By following these safety guidelines and instructions, you can ensure a safe and effective reloading experience with your L.E. Wilson Micrometer Top Bullet Seater Die. Thank you for prioritizing safety in your reloading practices.
