

222 REMINGTON BRASS - STARLINE 222 REMINGTON BRASS 100/BAG

[Reloading](#) > [Brass](#) > [Rifle Brass](#)

The .222 Remington was introduced in 1950 and quickly became the favorite caliber of many shooters and hunters. The "Triple Deuce" found a lot of success as a benchrest caliber due to its inherent accuracy and the small caliber/high velocity combination made it a great choice for all types of varmint hunting. While the .222 Remington has slipped in popularity to calibers such as the .223 Remington, it is still available from several rifle manufacturers and is just as capable of a cartridge as it ever was.

Attributes

- Name: [STARLINE 222 REMINGTON BRASS 100/BAG](#)
- Manufacturer: [STARLINE](#)
- Product no.: 749100018
- Mfr. No.: 3450100BAG

Safety Instruction Guide for 222 Remington Brass

Introduction

Thank you for choosing the 222 Remington Brass by Starline. This guide provides essential safety instructions to ensure safe handling and usage of this product. Please read and understand these instructions before using the brass cartridges to ensure a safe and enjoyable experience.

General Safety Guidelines

- Ensure that you are familiar with local laws and regulations regarding the use of ammunition and reloading components.
- Always handle all ammunition and reloading components with care and respect.
- Store ammunition and reloading components in a secure location, away from children and unauthorized users.
- Do not use damaged or defective brass. Inspect each piece before use.
- Keep your workspace clean and organized to prevent accidents.
- Always wear appropriate safety gear, including eye and ear protection, when handling ammunition or during shooting activities.

Specific Safety Precautions for Use

- Only use the 222 Remington Brass in firearms that are specifically chambered for this caliber.
- Do not exceed the recommended load data provided by reputable sources when reloading.
- Avoid using brass that shows signs of excessive wear, such as cracks, splits, or severe discoloration.
- Be aware of the potential for misfires and hangfires. Follow proper procedures for dealing with these situations.
- Always ensure that the firearm is pointed in a safe direction when loading, unloading, or handling ammunition.

Instructions for Installation and Usage

- Before using the brass, ensure that your reloading equipment is clean and in good working condition.
- Follow these steps for reloading:
 1. Inspect the brass for any defects.
 2. Clean the brass if necessary to remove any residue or dirt.
 3. Resize the brass according to the specifications for the 222 Remington caliber.
 4. Prime the brass with the appropriate primers.
 5. Charge the brass with the correct amount of powder as per reliable load data.
 6. Seat the bullet to the recommended overall length.
 7. Crimp the bullet if necessary, ensuring a secure fit.
- Store loaded ammunition in a cool, dry place, away from direct sunlight and moisture.

Disposal Instructions

- Dispose of any damaged or defective brass in accordance with local regulations.
- Do not throw brass in regular trash. Instead, consider recycling options available in your area.
- If you have unused or unwanted ammunition, contact local authorities or a licensed disposal service for safe disposal.

Contact Information for Further Support

For any inquiries regarding safety or product information, please refer to the manufacturer's contact details provided with your product packaging or visit the manufacturer's website.

Conclusion

Safety is paramount when handling ammunition and reloading components. By following these guidelines and precautions, you can ensure a safe and successful experience with the 222 Remington Brass. Always prioritize safety and responsibility in all shooting and reloading activities.
