

SINCLAIR COMPETITION SHOOTING REST - SINCLAIR INTERNATIONAL BENCHREST COMPETITION AMBIDEXTROUS SHOOTING REST

[Shooting Accessories](#) > [Shooting Rests](#) > [Rifle Rests](#)

The Sinclair Competition Shooting Rest is a result of our staff and our customer's years of shooting experience on the firing line, and in the field. We've incorporated the best design ideas, materials, and craftsmanship to present you with a shooting platform that rivals any windage rest available today. Whether you're competing in a benchrest discipline, F-Class, or wringing the most accuracy from your favorite shooting rig, the Sinclair Competition Rest offers the most versatile fit, function, and features in one complete package. NOTE: You will need to order a front bag in addition to the rest. We recommend the Protector Leather/Cordura or the Edgewood Standard Front Bags. Heavy and Compact The Sinclair Competition Rest's foundation begins with a one inch, solid steel base plate with a durable granite powder coat finish. This enables us to achieve a massive unit - over 30 pounds - with the lowest center of gravity, combined with a footprint that's no larger than other tripod rests currently on the market. It's nearly twice as heavy as our closest competitor. Mobile Most shooting rests by design, are awkward and difficult to manage and maneuver. We solved this by machining a carry handle into the base plate for easy transport, making the Sinclair Competition Rest one of the most mobile units available, in spite of its enormous weight. No tacky looking handles or impossible two-arm lift methods are needed.

Effortless Operation The Sinclair Competition Rest has the windage operation built directly into the base plate. It incorporates dual sets of twin tapered roller bearings for an effortless, non-binding windage operation. The oversized windage control knob is positioned near the rear speed screw where simultaneous one-handed adjustment is easily achievable. Nearly four feet of windage adjustment is offered at 100 yards - enough for any bench shooting discipline. The oversized, fluted handwheel also offers smooth vertical adjustment with the aid of a thrust bearing. A non-windage-adjustable model is available for shooters who prefer to adjust windage off the rear bag or do not have a need for the windage adjustable base block. Ambidextrous Design

The unique construction of this windage unit platform enables an entirely ambidextrous set-up for right or left handed shooters. The post, center column, controls and windage adjustment disassemble and reassemble on the opposite side, for a completely mirrored, left hand use. Hardware for Hard Wear The Sinclair Competition Rest includes upgraded hardware: a beefed up center column (1.95" up from 1.375"); threaded post (1" diameter up from 3/4"); leg screws (1/2" diameter up from 3/8"); and large diameter fluted speed screw - all made from high grade stainless steel to withstand a lifetime of abuse. All knob controls and handwheel are machined from aluminum then anodized or powder coated to provide a durable grip surface for all adjustments. Topping Perfection The Sinclair Competition Rest is completed with our Benchrest Top with new lockable forend stop assembly. Our Benchrest Top accepts both Edgewood and Protektor front bags in sporter, varmint, and benchrest configurations. The new lockable forend stop unit is adjustable for length (fore-aft), height, and cant. Our benchrest top is both NBRSA and IBS approved for competition shooting. The Sinclair Competition Rest is also available with our All-Purpose Top which features our updated Sinclair designed Edgewood Bag, easy adjust lockable bag ears and new forend stop. This top is an excellent choice for all Rimfire Benchrest

competitions, particularly Sporter Rifle Class, as well as those wishing to attain the highest level of accuracy from all of their rifles. Accessories The Sinclair Competition Rest includes mounting holes for aftermarket accessories you may wish to entertain. Such as our Port Level Ammo Block which enables the shooter to adjust their tray of 20 rounds of PPC or BR wherever needed. Move it close to your rifle port for fast shooting.

The Sinclair Competition Shooting Rest is a result of our staff and our customer's years of shooting experience on the firing line, and in the field. We've incorporated the best design ideas, materials, and craftsmanship to present you with a shooting platform that rivals any windage rest available today. Whether you're competing in a benchrest discipline, F-Class, or wringing the most accuracy from your favorite shooting rig, the Sinclair Competition Rest offers the most versatile fit, function, and features in one complete package. These do not work with the 749-013-833 speed screw on the Sinclair Competition Rests. NOTE: You will need to order a front bag in addit

Sinclair Competition Shooting Rest Safety Instructions

Introduction

Thank you for choosing the Sinclair Competition Shooting Rest. This product is designed to provide you with a stable and versatile platform for your shooting needs. To ensure your safety and the safety of others, please read and follow these safety instructions carefully.

General Safety Guidelines

- Ensure the shooting rest is used in a safe environment, away from people and animals.
- Always handle firearms with care and follow all local laws and regulations regarding firearm use.
- Regularly inspect the shooting rest for any signs of wear or damage before each use.
- Store the shooting rest in a dry place to prevent rust or corrosion of the steel material.
- Always use the shooting rest in conjunction with appropriate shooting bags and equipment.

Specific Safety Precautions for Use

- Do not exceed the weight limit of the shooting rest, which is 30 lbs.
- Ensure that the height adjustment is secure before use, and do not adjust while under load.
- Keep hands and body clear of the shooting area when adjusting the rest.
- Be aware of the windage adjustment, ensuring it is correctly set before shooting.
- Avoid using the Sinclair Competition Shooting Rest with the 749013833 speed screw, as it is not compatible.

Instructions for Installation and Usage

1. Assembly:

- Remove all components from the packaging.
- Follow the assembly instructions provided to ensure all parts are correctly fitted.

2. Setting Up the Shooting Rest:

- Place the shooting rest on a stable and level surface.
- Adjust the height from 5" to 10" as needed, ensuring all adjustments are locked securely.
- Position the front bag (not included) in the designated area on the shooting rest.

3. Using the Shooting Rest:

- Secure your firearm in the shooting rest, ensuring it is stable and properly supported.
- Make any necessary windage adjustments, checking that they are secure.
- Always keep the shooting area clear of unauthorized personnel while shooting.

4. PostUse Care:

- After use, clean the shooting rest to remove any dirt or debris.
- Store the shooting rest in a protective cover or case to prevent damage.

Disposal Instructions

- When the Sinclair Competition Shooting Rest reaches the end of its life, dispose of it responsibly.

- Contact your local waste management authority for guidance on disposing of steel products.
- Do not dispose of the product in regular household waste.

Contact Information for Further Support
