

SMALL FLASH HOLE DEBURRING TOOL - REDDING SMALL FLASH HOLE DEBURRING TOOL

[Reloading](#) > [Case Preparation](#) > [Flash Hole Deburring Tools](#)

Burrs that can cause erratic ignition are often left inside the case at the flash hole during manufacturing. The small tool is for .17 & .20 caliber and cases with small .060" flash holes. This tool does not control the cutting depth. The operator must control the cutting depth using the small pilot stops for 9-64" mandrels.

SMALL FLASH HOLE DEBURRING TOOL Safety Instruction Guide

Introduction

Thank you for choosing the Redding Small Flash Hole Deburring Tool. This tool is designed to help you remove burrs that can cause erratic ignition in cases with small flash holes. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Always read and follow the manufacturer's instructions.
- Keep the tool out of reach of children to prevent accidents.
- Inspect the tool before each use for any signs of damage or wear.
- Use the tool only for its intended purpose.
- Wear appropriate personal protective equipment (PPE), such as safety glasses and gloves, while using the tool.
- Ensure your workspace is clean and free from hazards.
- Be cautious when handling sharp edges.

Specific Safety Precautions for Use

- Do not exceed the recommended cutting depth; the operator must control this using the small pilot stops.
- Ensure that the tool is securely attached to the mandrel before use.
- Avoid applying excessive force while using the tool to prevent breakage.
- Always use the tool in a welllit area to maintain visibility.
- If you feel any resistance while using the tool, stop immediately and inspect for any obstructions.
- Do not use the tool if you are fatigued or under the influence of substances that impair your judgment.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary materials, including the Redding Small Flash Hole Deburring Tool, mandrels, and small pilot stops.
- Ensure that you have a clean and organized workspace.

2. Installation:

- Select the appropriate mandrel for your specific case size.
- Attach the small pilot stop to the mandrel securely.
- Insert the mandrel with the attached pilot stop into the deburring tool.

3. Usage:

- Position the tool over the flash hole of the case.
- Apply gentle pressure to the tool while rotating it in a clockwise direction.
- Monitor the cutting depth and adjust as necessary using the small pilot stops.
- After deburring, remove the tool and inspect the case for any remaining burrs.

4. PostUsage:

- Clean the tool after each use to maintain its effectiveness.

- Store the tool in a safe and dry location, away from children and pets.

Disposal Instructions

- Dispose of the tool responsibly at the end of its life cycle.
- Check local regulations for proper disposal methods for tools and sharp objects.
- Do not throw the tool in regular household waste.

Contact Information for Further Support

For any safety inquiries or product support, please refer to the manufacturer's contact details provided on the packaging or visit the official website.

Conclusion

By following these safety instructions, you can ensure a safe and effective experience with the Redding Small Flash Hole Deburring Tool. Always prioritize safety and report any unsafe products or incidents to the appropriate authorities. Thank you for your commitment to safe usage!
