

SINCLAIR COMPETITION SHOOTING REST NON-WINDAGE - SINCLAIR INTERNATIONAL BENCHREST COMPETITION SHOOTING REST NON-WINDAGE

[Shooting Accessories](#) > [Shooting Rests](#) > [Shooting Rest Accessories](#)

The Sinclair Competition Shooting Rest is a result of our staff and our customer's years of shooting experience on the firing line, and in the field. We've incorporated the best design ideas, materials, and craftsmanship to present you with a shooting platform that rivals any windage rest available today. Whether you're competing in a benchrest discipline, F-Class, or wringing the most accuracy from your favorite shooting rig, the Sinclair Competition Rest offers the most versatile fit, function, and features in one complete package. Do not work with the 749-013-833 speed screw on the Sinclair Competition Rests. NOTE: You will need to order a front bag in addition to the rest. We recommend the Protector Leather/Cordura or the Edwood Standard Front Bags. Heavy and Compact The Sinclair Competition Rest's foundation begins with a one inch, solid steel base plate with a durable granite powder coat finish. This enables us to achieve a massive unit - over 30 pounds - with the lowest center of gravity, combined with a footprint that's no larger than other tripod rests currently on the market. It's nearly twice as heavy as our closest competitor. Mobile Most shooting rests by design, are awkward and difficult to manage and maneuver. We solved this by machining a carry handle into the base plate for easy transport, making the Sinclair Competition Rest one of the most mobile units available, in spite of its enormous weight. No tacky looking handles or impossible two-arm lift methods are needed. Effortless Operation The Sinclair Competition Rest has the windage operation built directly into the base plate. It incorporates dual sets of twin tapered roller bearings for an effortless, non-binding windage operation. The oversized windage control knob is positioned near the rear speed screw where simultaneous one-handed adjustment is easily achievable. Nearly four feet of windage adjustment is offered at 100 yards - enough for any bench shooting discipline. The oversized, fluted handwheel also offers smooth vertical adjustment with the aid of a thrust bearing. A non-windage-adjustable model is available for shooters who prefer to adjust windage off the rear bag or do not have a need for the windage adjustable base block. Ambidextrous Design The unique construction of this windage unit platform enables an entirely ambidextrous set-up for right or left handed shooters. The post, center column, controls and windage adjustment disassemble and reassemble on the opposite side, for a completely mirrored, left hand use. Hardware for Hard Wear The Sinclair Competition Rest includes upgraded hardware: a beefed up center column (1.95" up from 1.375"); threaded post (1" diameter up from 3/4"); leg screws (1/2" diameter up from 3/8"); and large diameter fluted speed screw - all made from high grade stainless steel to withstand a lifetime of abuse. All knob controls and handwheel are machined from aluminum then anodized or powder coated to provide a durable grip surface for all adjustments. Topping Perfection The Sinclair Competition Rest is completed with our Benchrest Top with new lockable forend stop assembly. Our Benchrest Top accepts both Edgewood and Protektor front bags in sporter, varmint, and benchrest configurations. The new lockable forend stop unit is adjustable for length (fore-aft), height, and cant. Our benchrest top is both NBRSA and IBS approved for competition shooting. The Sinclair Competition Rest is also available with our All-Purpose Top which features our updated Sinclair designed Edgewood Bag, easy adjust lockable bag ears and

new forend stop. This top is an excellent choice for all Rimfire Benchrest competitions, particularly Sporter Rifle Class, as well as those wishing to attain the highest level of accuracy from all of their rifles. Accessories The Sinclair Competition Rest includes mounting holes for aftermarket accessories you may wish to entertain. Such as our Port Level Ammo Block which enables the shooter to adjust their tray of 20 rounds of PPC or BR wherever needed. Move it close to your rifle port for fast shooting.

Attributes

- Name: [SINCLAIR INTERNATIONAL BENCHREST COMPETITION SHOOTING REST NON-WINDAGE](#)
- Manufacturer: [SINCLAIR INTERNATIONAL](#)
- Product no.: 749122023

Sinclair Competition Shooting Rest Safety Instructions

Introduction

Thank you for choosing the Sinclair Competition Shooting Rest. This product is designed to provide a stable and accurate shooting platform. To ensure your safety and the optimal performance of the rest, please read and follow these safety instructions carefully.

General Safety Guidelines

- Ensure safe use of the Sinclair Competition Shooting Rest by following these guidelines:
 - Always inspect the rest before each use for any signs of damage or wear.
 - Use the rest only for its intended purpose as described in the product manual.
 - Keep the rest out of reach of children and vulnerable individuals when not in use.
 - Follow all local laws and regulations regarding the use of shooting equipment.
 - If you notice any unusual noises or performance issues during use, stop immediately and inspect the rest.

Specific Safety Precautions for Use

- When using the Sinclair Competition Shooting Rest, please observe the following precautions:
 - Do not exceed the weight limit specified by the manufacturer.
 - Always use a front bag in conjunction with the rest for stability.
 - Ensure that the area around you is clear of people and obstacles before setting up the rest.
 - Use the rest on a flat and stable surface to prevent tipping or instability.
 - Avoid using the rest in adverse weather conditions that may affect its stability or your safety.
 - Do not attempt to modify or alter the rest in any way, as this may compromise its safety.

Instructions for Installation and Usage

1. Setup:

- Place the Sinclair Competition Shooting Rest on a flat, stable surface.
- Ensure that the base plate is level and secure.
- Attach the appropriate front bag to the rest, ensuring it is secured properly.

2. Adjustments:

- Use the oversized windage control knob for adjustments. Make sure to do this with one hand while keeping the other hand steady on the firearm.
- For vertical adjustments, use the fluted handwheel, ensuring smooth operation.

3. Transport:

- When transporting the rest, use the carry handle integrated into the base plate for easy maneuverability.
- Ensure that all parts are secured and that the rest is not damaged during transport.

4. Maintenance:

- Regularly check all hardware and components for signs of wear or damage.
- Clean the rest after use to remove dirt and debris, ensuring it remains in good working condition.

Disposal Instructions

- When the Sinclair Competition Shooting Rest reaches the end of its life cycle, please dispose of it responsibly:
 - Separate any metal components from nonmetal parts.
 - Follow local regulations for disposal of metal and plastic materials.
 - Consider recycling whenever possible to minimize environmental impact.

Contact Information for Further Support

- For any safety inquiries or product support, please refer to the contact information provided with your product or visit the manufacturer's website for assistance.

By following these safety instructions, you can ensure a safe and enjoyable experience with your Sinclair Competition Shooting Rest. Thank you for your attention to safety!
