**SHORT LENGTH WIRE GAUGE DRILLS** The Triumph Twist Drill Co. Short Length Wire Gauge Drills are high-quality tools crafted for professionals and enthusiasts who demand precision and durability in their drilling applications. Designed for tight spaces and detailed tasks, these drills are a reliable choice for gunsmiths and machinists. Key Features: High-Speed Steel (HSS) Construction: Made from durable high-speed steel, these drills deliver excellent wear resistance, heat tolerance, and longevity, even under rigorous use. Short-Length Design: The compact length provides enhanced rigidity, making these drills ideal for precision work in confined spaces where longer drills may flex or be impractical. Wire Gauge Sizing: Available in a wide range of wire gauge sizes, these drills are perfect for detailed work, particularly in firearms maintenance, modifications, and other fine machining tasks. Precision-Ground Cutting Edges: Engineered for clean, accurate holes, the sharp cutting edges minimize wandering and chipping, ensuring consistent results. Specs Made of High Speed Steel 135° Self-Centering Point Coating/Finish: Black Oxide Applications: The Triumph Twist Drill Co. Short Length Wire Gauge Drills are ideal for gunsmithing tasks that require fine detail, such as drilling pinholes, scope mounts, or other intricate firearm modifications. Their compact design also makes them suitable for other precision work in metals, plastics, and wood. Customer Feedback: Users appreciate the durability and precision of these short-length drills, often highlighting their effectiveness in tight spaces. The high-speed steel construction and sharp cutting edges are frequently praised for delivering reliable, clean results. Summary: The Triumph Twist Drill Co. Short Length Wire Gauge Drills offer precision and dependability in a compact package. Built with high-speed steel and designed for detailed work, these drills are an essential tool for gunsmiths and machinists. Whether working in confined spaces or requiring exceptional accuracy, these drills provide the performance and quality expected from Triumph Twist Drill Co. products.

# Safety Instruction Guide for SHORT LENGTH WIRE GAUGE DRILLS

## Introduction

Thank you for choosing the Triumph Twist Drill Co. Short Length Wire Gauge Drills. These highquality tools are designed for precision and durability in various applications, particularly in gunsmithing and machining. This guide provides essential safety instructions to ensure safe use and maintenance of the product in compliance with the EU General Product Safety Regulation (GPSR).

## General Safety Guidelines

- Always read and understand the user manual before using the product.
- Keep the product out of reach of children and other vulnerable individuals.
- Inspect the drills for damage before each use. Do not use damaged tools.
- Ensure the work area is clean and welllit to avoid accidents.
- Wear appropriate personal protective equipment (PPE), including safety glasses and gloves.
- Use the drills only for their intended purpose and in accordance with the manufacturer's instructions.
- Report any unsafe conditions or incidents to the appropriate authorities.

## Specific Safety Precautions for Use

- **Handling:** Always handle the drills with care. The cutting edges are sharp and can cause injury.
- **Storage:** Store the drills in a secure location, away from moisture and extreme temperatures. Use protective cases if available.
- **Operation:**
  - Use a drill press or a stable workstation for better control during use.
  - Do not force the drill; apply steady pressure to avoid breakage.
  - Keep hands and other body parts away from the drill bit during operation.
- **Maintenance:** Regularly clean the drills to remove debris and ensure optimal performance. Inspect for wear and replace if necessary.

## Instructions for Installation and Usage

- **Installation:**
  - Ensure that the drill bit is compatible with your drilling equipment.
  - Insert the drill bit into the chuck of the drill or drill press securely.
  - Tighten the chuck according to the manufacturer's specifications to prevent slippage during use.
- **Usage:**
  - Set the drill to the appropriate speed based on the material being drilled.
  - Mark the drilling point clearly on the workpiece.
  - Align the drill bit with the marked point and begin drilling at a slow speed to create a pilot hole.
  - Gradually increase the speed as needed, maintaining control of the drill.
  - After completing the drilling, remove the drill bit carefully and clean the work area.

## Disposal Instructions

- Dispose of any damaged drills or drill bits according to local waste disposal regulations.
- Do not throw away the drills in regular household waste.
- Consider recycling options for highspeed steel materials when available.
