## Volume II by Jerry Kuhnhausen

156 pages. 6" x 9". Softbound. Covers the J (Mk III), V, and AA (King Cobra). Explains the theory, goes through bench checks, disassembly, parts repair/replacement and reassembly. Though these models are similar, not all the parts interchange and Jerry covers what will, and what won't. He also covers fine-tuning to get the most from the design. The information on hands (critical to proper timing) is worth the price of the book alone. Video not available.
