

1911 GRIP SCREW BUSHING - WILSON COMBAT 1911 GRIP SCREW BUSHING, STAINLESS

[Handgun Parts](#) > [Grip Parts](#) > [Grip Bushings](#)

Standard thickness grip screw bushings are a direct replacement for one that is damaged or stripped during use. Note: Most factory installed bushings require removal of rear staking for new bushing installation. Re-staking or loctite 271 are acceptable ways to secure your new bushing in the frame. Sold as a set of 4.

1911 Grip Screw Bushing Safety Instruction Guide

Introduction

Thank you for choosing the 1911 Grip Screw Bushing by Wilson Combat. This product is designed to provide a reliable and durable solution for replacing damaged or stripped grip screw bushings in your 1911 firearm. To ensure your safety and the proper functioning of your firearm, please read and follow all safety instructions and guidelines outlined in this document.

General Safety Guidelines

- Always ensure that your firearm is unloaded before performing any maintenance or installation.
- Keep the product and all tools out of reach of children and unauthorized users.
- Inspect the product for any signs of damage before use. Do not use if damaged.
- Follow all applicable laws and regulations regarding firearm modifications and maintenance in your jurisdiction.
- Report any unsafe products or accidents to the appropriate authorities.
- Check for recall updates on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Ensure that the grip screw bushing is compatible with your specific model of 1911 (Government, Commander, Officers).
- Be cautious when removing the old bushing to avoid damaging the frame of the firearm.
- Use proper tools and protective equipment when installing the new bushing.
- If using Loctite 271 to secure the bushing, follow the manufacturer's instructions for application and curing time.
- Do not attempt to restake the bushing if you are unsure of the process; seek professional assistance if needed.

Instructions for Installation and Usage

1. Preparation

- Ensure your firearm is unloaded.
- Gather necessary tools: a bushing wrench, screwdriver, and Loctite 271 (if applicable).

2. Removing the Old Bushing

- Carefully remove the grip panels to access the bushing.
- Use the bushing wrench to unscrew the damaged or stripped bushing.
- Inspect the frame for any damage that may have occurred during removal.

3. Installing the New Bushing

- Clean the threaded area in the frame to remove any debris or old adhesive.
- Apply a small amount of Loctite 271 to the threads of the new bushing (optional).
- Using the bushing wrench, carefully screw in the new bushing until it is secure.
- Ensure the bushing is properly aligned and seated.

4. Restaking (if necessary)

- If the original bushing was staked, you may need to restake the new bushing using a staking tool.
- Follow the manufacturer's guidelines for proper staking techniques.

5. Reattaching the Grip Panels

- Once the bushing is securely installed, reattach the grip panels.
- Ensure all screws are tight and the panels are secure before handling the firearm.

Disposal Instructions

- Dispose of any old or damaged bushings in accordance with local regulations.
- Do not dispose of materials in regular household waste if they are considered hazardous.

Contact Information for Further Support

For any questions or concerns regarding the installation or safety of the 1911 Grip Screw Bushing, please refer to the manufacturer's contact information provided with your product packaging.

By following these guidelines and instructions, you can ensure the safe and effective use of your 1911 Grip Screw Bushing. Thank you for your attention to safety.
