## Improves Accuracy, Functioning; Eliminates Frame Cracking From Recoil

Easy-to-install kit instantly improves cycling, reliability and accuracy without modifying the frame or the slide. Exclusive, injection-molded, polyfiber buffers slip onto the guide rod between the head and spring and keep the slide from hitting the frame. Prevents expensive frame damage and softens the felt recoil of high power competition loads. Full-length guide rod keeps the recoil spring straight for smoother functioning and longer spring life. Together they provide consistent barrel lockup and increased accuracy.
