## Helps Reduce Bolt "Bounce" For Improved Feeding

High-quality, reduced power, action spring helps cure feeding problems caused by excessive bolt "bounce" in fixed-stock rifles configured for 3-shot burst or full-auto modes of fire. Helps shooters fine-tune action cycling for light, target/varmint loads in semi-auto rifles.

# Safety Instruction Guide for AR15/M16 Rifle Length Reduced Power Action Spring

## Introduction

Thank you for choosing the AR15/M16 Rifle Length Reduced Power Action Spring by WOLFF. This highquality, reduced power action spring is designed to enhance the performance of your rifle, particularly in addressing feeding problems caused by excessive bolt "bounce." This guide provides essential safety instructions and usage guidelines to ensure the safe and effective operation of your product.

## General Safety Guidelines

- Ensure that you are familiar with the operation of your firearm before using this product.
- Always handle firearms with care and treat every firearm as if it is loaded.
- Keep the action of your firearm open when not in use.
- Store your firearm and accessories in a secure location, out of reach of children and unauthorized users.
- Always wear appropriate eye and ear protection when firing your rifle.
- Be aware of your surroundings and ensure a safe shooting environment.

## Specific Safety Precautions for Use

- This action spring is specifically designed for .223 caliber AR15/M16 rifles with fixed A1/A2 rifle stocks.
- Do not use this product in adjustable stock carbines.
- Inspect the action spring for any signs of damage or wear before installation. Do not use if damaged.
- Ensure that the firearm is unloaded before installing or replacing the action spring.
- Follow all manufacturer guidelines and local laws regarding firearm modifications and usage.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure the firearm is unloaded.
- Gather necessary tools for installation, including a screwdriver and appropriate safety gear.

### 2. Installation:

- Open the action of the firearm and remove the existing action spring.
- Carefully install the WOLFF Reduced Power Action Spring in accordance with the manufacturer's specifications.
- Ensure that the spring is seated properly and that there are no obstructions in the action.

### 3. Testing:

- After installation, conduct a function test to ensure the rifle cycles correctly with the new action spring.
- Use light, target, or varmint loads to finetune action cycling as needed.

### 4. Regular Maintenance:

- Regularly inspect the action spring and other components of your rifle for wear and tear.
- Clean and lubricate your firearm according to the manufacturer's recommendations.

## **Disposal Instructions**

- Dispose of the action spring in accordance with local regulations.
- Do not dispose of the spring in regular household waste. Check with local waste management authorities for proper disposal methods.

## **Contact Information for Further Support**

For any questions or concerns regarding the safety and usage of the AR15/M16 Rifle Length Reduced Power Action Spring, please refer to the manufacturer's website or contact their customer service for assistance.

## **Conclusion**

By following these safety instructions and guidelines, you can ensure the safe and effective use of your AR15/M16 Rifle Length Reduced Power Action Spring. Always prioritize safety and compliance with local laws when handling firearms and their components. Thank you for your attention to these important safety measures.
