# Safety Instruction Guide for 700 /721/722 Ejector Spring WOLFF Rem. EP Ejector Spring

## Introduction

Thank you for choosing the WOLFF Rem. EP Ejector Spring for your Remington bolt rifle. This product is designed to enhance the performance of your firearm by providing improved ejection. It is essential to follow safety guidelines and instructions for proper installation and use to ensure your safety and the safe operation of your firearm.

## General Safety Guidelines

- Always handle firearms with care and ensure they are unloaded when performing any maintenance or installation.
- Use only the specified ejector spring for your Remington model 700, 721, or 722.
- Keep the product and all related tools out of reach of children and unauthorized individuals.
- Familiarize yourself with the specific safety regulations and laws regarding firearms in your area.
- Regularly inspect your firearm and its components for wear and damage.

## Specific Safety Precautions for Use

- Ensure that the firearm is in a safe condition before beginning installation. Always check that the chamber is empty.
- Wear appropriate safety gear, including safety glasses and gloves, when handling and installing the ejector spring.
- Do not attempt to install the ejector spring if you are unsure of the process. Seek assistance from a qualified gunsmith if needed.
- Avoid using excessive force when installing the spring to prevent damage to the firearm or injury.
- Be aware of the potential for spring tension during installation. Use caution to avoid injury from sudden release.

## Instructions for Installation and Usage

### 1. Preparation:

- Gather all necessary tools and safety equipment before starting the installation process.
- Ensure the firearm is unloaded and in a safe working environment.

### 2. Removal of Old Ejector Spring:

- Carefully disassemble the bolt assembly according to the manufacturer's instructions.
- Locate the old ejector spring and remove it gently, taking care to avoid damage to surrounding components.

### 3. Installation of New Ejector Spring:

- Take the new WOLFF Rem. EP Ejector Spring and inspect it for any visible defects.
- Position the new ejector spring in the appropriate location within the bolt assembly.
- Ensure that the spring is seated properly and secured in place.

### 4. Reassembly:

- Reassemble the bolt assembly carefully, following the manufacturer's guidelines.

- Ensure all components are aligned correctly and securely fastened.

#### **5. Testing:**

- Once the installation is complete, test the ejector function in a safe environment.
- Always perform this test with the firearm pointed in a safe direction and in a controlled setting.

## **Disposal Instructions**

- Dispose of the old ejector spring and any packaging materials in accordance with local regulations.
- Avoid disposing of springs in a manner that could pose a risk to the environment or public safety.

## **Contact Information for Further Support**

For any questions regarding the installation, usage, or safety of the WOLFF Rem. EP Ejector Spring, please consult a qualified gunsmith or refer to the manufacturer's resources for guidance.

## **Conclusion**

By following these safety instructions and guidelines, you can ensure the safe and effective use of your WOLFF Rem. EP Ejector Spring. Always prioritize safety and seek professional assistance if you have any doubts or concerns during the installation process. Thank you for your commitment to firearm safety.
