## Stamp Your Own Combination Of Numbers & Specs In Softer Steels & Metals

Hand cut and taper-ground to make "factory perfect" impressions when marking custom rifle barrels and other metal objects you want to professionally identify. Made from only the finest quality steel, selected for its proven ability to stand the gaff, then heat-treated to three distinct hardnesses. The character end is hardened to Rc 62 to prevent chipping. Hammer end is crowned and hardened to prevent mushrooming and the center is hardened to transmit the hammer blow. Sharply cut Gothic characters ensure a deep, clear impression. Smooth, ground taper improves appearance and eliminates cracks that sometimes develop in a rough taper. Each stamp is individually inspected and marked with index on thumb side so you'll always know which way the stamp is facing. Sets of letters consist of 27 characters, including period. Sets of figures consist of nine characters from 0 to 8, the 6 also being used for the 9. Packed in sturdy wooden box with lid.

NOTE: Steel Stamps are intended for softer steels, barrels, etc. DO NOT use on hardened or plated steels, knife blades, tough alloys. Misuse voids guarantee.

## Specific Safety Precautions for Use

- Always wear appropriate personal protective equipment (PPE) such as safety goggles and gloves when using the stamp set.
- Ensure that the work area is clean and free from clutter to prevent accidents.
- Use the stamp set on a stable and secure surface to avoid slipping or movement during use.
- Do not apply excessive force when stamping; this may cause the stamp to chip or break.
- Inspect the stamps regularly for signs of wear or damage. If any stamps are damaged, discontinue use immediately.
- Never use the stamp set for any purpose other than its intended use.

## Instructions for Installation and Usage

### 1. Preparation:

- Gather all necessary materials, including the stamp set, a hammer, and the metal object to be stamped.
- Ensure the metal object is clean and free of debris.

### 2. Setting Up:

- Place the metal object on a stable work surface.
- Position the stamp in the desired location on the metal object.

### 3. Stamping Process:

- Hold the stamp firmly by the character end.
- Align the stamp vertically above the chosen area on the metal object.
- Using a hammer, strike the crown end of the stamp with a firm, controlled blow.

- Avoid excessive force; one solid strike is usually sufficient.

#### **4. PostUse:**

- After stamping, inspect the impression for clarity.
- Clean the stamps after use to maintain their quality and longevity.

## **Disposal Instructions**

- Dispose of any damaged or wornout stamps in accordance with local regulations regarding metal waste.
- Do not dispose of the product in general household waste. Check for recycling options in your area.
