

# Elite Muzzle Brakes - MDT Accessories - Muzzle Brake - Elite - .223REM 1/2-28 - BLK

[Rifle Parts](#) > [Muzzle Devices](#) > [Compensators & Muzzle Brakes](#)

The MDT Elite Muzzle Brake has 35 degree angled baffles for increased recoil reduction while keeping a more streamlined design. By reducing recoil up to 66% the follow-up shot speed and accuracy is greatly improved while a straight cut through the rear baffle reduces concussive forces. MDT Muzzle Brakes are constructed out of alloy steel with a nitride finish and are provided with an overlapping lock nut. The nut offers some tuneability, as well as the ability to index the brake to make it straight. Perfect for recoil-sensitive shooters. Must be used on threaded barrels.

# MDT Elite Muzzle Brake Safety Instruction Guide

## Introduction

Thank you for choosing the MDT Elite Muzzle Brake. This guide provides important safety information and instructions to ensure the safe and effective use of your muzzle brake. Please read this document carefully before installation and use.

## General Safety Guidelines

- Ensure the MDT Elite Muzzle Brake is compatible with your firearm's threaded barrel (1/228).
- Always treat firearms and accessories as if they are loaded.
- Keep the muzzle brake out of reach of children and unauthorized users.
- Use appropriate personal protective equipment (PPE), such as eye and ear protection, when shooting.
- Regularly inspect the muzzle brake for wear and damage.
- Follow all local laws and regulations regarding the use of muzzle brakes and firearms.

## Specific Safety Precautions for Use

- **Recoil Sensitivity:** The MDT Elite Muzzle Brake significantly reduces recoil (up to 66%). However, be aware that some shooters may still experience discomfort. Adjust your shooting position as needed.
- **Concussive Forces:** The design of the muzzle brake reduces concussive forces, but be mindful of your surroundings and ensure others are at a safe distance when firing.
- **Installation:** Only install the muzzle brake on properly threaded barrels. Incorrect installation can lead to malfunctions or accidents.
- **Lock Nut Adjustment:** The overlapping lock nut allows for tuning and indexing. Make sure it is securely tightened before use to prevent any movement during firing.

## Instructions for Installation and Usage

### Installation

#### 1. Tools Required:

- Torque wrench
- Appropriate size wrench for the lock nut

#### 2. Steps:

- Ensure the firearm is unloaded and pointed in a safe direction.
- Remove any existing muzzle device from the threaded barrel.
- Clean the threads of the barrel to ensure proper fit.
- Screw the MDT Elite Muzzle Brake onto the threaded barrel by hand until snug.
- Use the wrench to tighten the lock nut securely, following the manufacturer's torque specifications.
- Index the brake to ensure it is straight and aligned with the bore.

### Usage

- Always ensure the muzzle brake is securely attached before shooting.
- Fire the firearm in a controlled environment, ensuring a safe backdrop.
- Monitor the performance of the muzzle brake during use. If you notice any unusual behavior or damage, stop using it immediately and seek assistance.

## **Disposal Instructions**

- Dispose of the MDT Elite Muzzle Brake in accordance with local regulations.
- If the product is damaged or no longer usable, ensure it is disposed of in a manner that prevents any potential hazards to others.

## **Contact Information for Further Support**

For any safety inquiries or product concerns, please refer to the manufacturer's contact details provided with your product packaging or visit the official website for support resources.

Please remember to report any unsafe products or incidents to the appropriate authorities and check for recall updates on the EU's Safety Gate platform. Your safety is our priority. Thank you for your attention to these guidelines.
